NOTES

25X1

USSR-GUINEA: Two Soviet destroyers, one armed with surface-to-air missiles, and an oiler arrived in Conakry on 24 December.

25X1

The Soviet ships have been operating off the coast of West Africa for the past several weeks, but Moscow apparently seized upon the idea of a lengthy port visit as a show of support to Guinean President Sekou Toure who fears another Portuguese-backed attack similar to the one on Conakry last month. The sending of these destroyers to Guinea is yet another example of a greater Soviet tendency to use naval forces to advance foreign policy purposes in distant areas.
